Notice Regarding Technical Center Box Issue Fee Mailings

The Office will begin mailing address labels with the PTOL-85, "Notice of Allowance and Issue Fee Due" for patent applications allowed in all Technology Centers. These address labels should be used to ensure proper routing of post-allowance correspondence. This directive supersedes the "Special Boxes for Patent Mail" instruction. Any Notice of Allowance and Issue Fee Due received without the accompanying address labels should continue to be addressed to Box Issue Fee.

Status of Certification Services

On November 28, 1995, the Office published an Official Gazette Notice entitled "Temporary Suspension of At Cost Services for Orders for Certified Copies" (1180 OG 121) to advise practitioners and the public of delays in filling orders for certified copies of PTO documents. This is an update of actual days to mail for orders filled during the month of August 1998:

Certified Product	Goal	Actual Calendar Days to Mail
Patent Application-As-Filed, Expedited	7	6
Patent Application-As-Filed, Regular	17	10
Patent Related File Wrapper	25	67*
Patent Copy	10	4
Patent Assignments	10	5
Trademark Application-As-Filed, Expedited	7	6
Trademark Application-As-Filed, Regular	17	8
Trademark Related File Wrapper	25	33*
Trademark Assignments	10	7
Trademark Registration, Expedited	5	3
Trademark Registration, Regular	14	8

*** Includes turnaround times for files on official search and file reconstruction.**

The backlog of orders resulting from the relocation of the Office of Public Records in late March and early April has been worked down. During the month of August 1998, a total of 13,312 orders (26,126 copies) were filled and closed, or 4,788 orders (8,818 copies) more than the FY-98 planning number of 8,524 orders (17,308 copies) to be closed per month. The average turnaround times for products is returning to expected ranges as older orders are filled and closed.

Due to varying availability of media, customers will not be advised when orders are not delivered within the published goal periods. However, customers will be advised if any unexpected delay in their order has been identified. Customers should use the above actual days to mail for each product as a guide as to when they can expect their orders. In determining expected delivery times, the day an order is received in the Office is calculated as "day zero." The next business day is "day one."

Delivery of any specific copy will vary based on the availability of scanned images, microfilm products, and/or file accessibility. On June 10, 1997, the Office published an Official Gazette Notice entitled "Changes in Practice in Supplying Certified Copies and Filing Receipts" (1199 OG 39) which advised customers who place orders for certified copies of patent applications-as-filed not to request them until the official filing receipt is received; images and related bibliographic data are not available to Certification Division until the filing receipt is generated by the Office of Initial Patent Examination.

Customers are encouraged to fax orders for copies directly to Certification Division at (703) 308-9759 and to pay by PTO Deposit Account, MasterCard, Visa, or Discover. Information on the status of pending orders may be obtained by calling (703) 308-9726 or 1 (800) 972-6382 (outside the Washington, DC Metro area), or via E-mail: certdiv@uspto.gov.

Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Disclosures; Correction

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Correcting amendments.

SUMMARY: This document contains a correction to the rules relating to the format for nucleotide and/or amino acid sequence disclosures in patent applications.

EFFECTIVE DATE: September 10, 1998.

FOR FURTHER INFORMATION CONTACT: Esther M. Kepplinger, by telephone at (703) 308-1495; by mail addressed to: Box Comments - Patents, Assistant Commissioner for Patents, Washington, DC 20231 marked to her attention; by facsimile to (703) 305-3935; or by electronic mail at esther.kepplinger@uspto.gov.

SUPPLEMENTARY INFORMATION: Appendix B to Subpart G to Part 1 of title 37 of the Code of Federal Regulations is a listing entitled "Headings for Information Items in § 1.823." It contains the headings that were required prior to the June 1, 1998, amendment of the rules.

On June 1, 1998, the Patent and Trademark Office published a final rule entitled "Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Disclosures" in the *Federal Register* (63 FR 29620). The listing of headings in Appendix B is no longer correct in view of the final rule. The headings adopted in the final rule replaced those used in Appendix B. For this reason, Appendix B should have been removed from the final rule. Because Appendix B may be misleading, it is now being removed.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Courts, Freedom of information, Inventions and patents, Incorporation by reference, Reporting and recordkeeping requirements, Small businesses.

PART 1 - RULES OF PRACTICE IN PATENT CASES

Accordingly, 37 CFR Part 1 is corrected by making the following correcting amendment:

1. The authority citation for Part 1 continues to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

Appendix B To Subpart G To Part 1 [Corrected]

2. Remove Appendix B To Subpart G To Part 1.

Posting a List of Patents with 37 CFR 1.607(d) Notices on the PTO Web Site

When an applicant seeks to provoke an interference with a patent, 37 CFR 1.607(d) requires that the patentee be notified when the attempt to provoke the interference is first made. After notifications under 37 CFR 1.607(d) are mailed, they are placed in the patented files. They then become public records.

Recently, the PTO has begun receiving specific requests from members of the public for listings of patents which have had 37 CFR 1.607(d) notices mailed to the patentee. To provide this service to our customers, while reducing the administrative burden of processing individual requests, the PTO will post, within the next few months, a listing of all such patents. The posting will be provided on the PTO Home Page at www.uspto.gov. The first listing will include all patents in which a 37 CFR 1.607(d) notice has been mailed since January 1, 1998. Thereafter, the listing will be updated on a quarterly basis and the quarterly posting will list all patents from the previous three months containing such notices.

Inquiries regarding this matter should be directed to Magdalen Greenlief at (703) 305-8813.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) in Sunnyvale, California.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:

(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).

(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).

(3) All design patents are granted for a term of 14 years from the date of the grant.

However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
